

CREATING VALUES FOR OTHERS: VET* INSTITUTIONS PROVIDE VOCATIONAL QUALIFICATIONS (CREATIVO)

LED LIECHTENSTEIN
DEVELOPMENT
SERVICE

Short Project Description

In this project, vocational schools develop entrepreneurial activities so that vocational students acquire relevant skills and these schools manage to generate additional income.

In cooperation with and for private enterprises, on the one hand, demand-oriented further education courses are developed, e.g. in greenhouse cultivation (see photo). On the other hand, business plans are developed and implemented together with the students, e.g. a car repair shop attached to the school.

The CREATIVO project strengthens vocational schools financially, gives vocational students the opportunity to gain practical work experience, and increases the range of further education offered by the schools. This improves the quality of education and the employability of young people and adults.

***VET** = Vocational Education and Training

Project Goals

- Strong Partnerships between VET schools and enterprises
- VET schools design demand-driven CVET courses
- The schools develop demand-driven products and/or services
- Development and implementation of business plans with the involvement of VET students
- The management capacities of vocational schools are strengthened
